

SEE US AT BOOTH # 6718

Invitation to visit  **at the Photonics West 2004 Exhibition**
San Jose **January 27 - 29, 2004**

EXALOS was progressing in the first semester of its operation very successfully:

- Sales target has been largely met and all orders have been shipped on due time.
- We started a substantial amount of prospects in development.
- We expect these to support our high plans for the next business interval.
- EXALOS has released a complete new 830 nm product line
- EXALOS is releasing at the up-coming trade fair a very price competitive new line.

We would like to invite you and your colleagues to our booth at the Photonics West 2004
The following subject can be discussed at this occasion:

1. New 830 nm product line and the performance
2. Test- and Qualification programs for all EXALOS product lines
3. Development program for broad band SLED - 100 nm plus bandwidth
4. New price/performance structure – pricing policy at EXALOS
5. Funds for new programs

For your convenience, please contact chappuis@exalos.com for an appointment.

Best regards

J.P. Bitterli
VP Sales & Marketing
