EXALOS - Quality Commitment

EXALOS AG, a privately held company, was founded in June 2003 to develop, manufacture and sell Superluminescent Light Emitting Diodes (SLED) and other optoelectronic devices to the fiber optic gyroscope, medical imaging, test equipment and sensor industries. The company has its headquarters in Zürich, Switzerland.

EXALOS has released the highest-power superluminescent light emitting diodes (SLEDs) in commercial volumes. Wavelengths ranging from 800 to 1700 nm and powers of up to 60 mW ex-facet, best-in-class performance and largest product range are available. There is an increasing demand for these SLEDs for optical instrumentation and test equipment in telecommunications industry, medical diagnostics and imaging applications such as optical coherence tomography (OCT) and fiber optic gyroscopes (FOG) for navigation and fiber optic sensors.

EXALOS is committed to meeting the highest quality standards and has implemented all procedures in accordance with ISO 9001-2000 and will be certified before end of 2004. All standard products and customized products are qualified in accordance to TELCORDIA recommendations.

ISO 9001-2000

All work instructions in place

Certification in October 2004

BELLCORE GR-468-CORE

Reliability Standard for optoelectronic devices

Standard Products qualified by October 2004

EXALOS is serving customers on a worldwide base, in North America, Europe and Asia, for these applications. Currently, EXALOS serves more than 60 major customers across a broad spectrum of industries and application space. EXALOS forms part of the approved vendor list (AVL) of many of its clients and has won volume purchase agreements (VPA) with a number of significant customers as vendor of choice.

As the preferred supplier of best price/performance value SLEDs to the world and after forthcoming additions to its product range, EXALOS is poised to significantly increase its market presence as the global leader. EXALOS is aggressively expanding, and has the right people in the sales and marketing force, to enhance its global presence and to help serve its customers' growing needs worldwide. Plus EXALOS has a broad network of sales and service partners in the USA, Europe and ASIA.
